EXPERIENCE

Headington Company | Dallas, TX | Project Manager February 2026 - Present

- Coordinate web and content projects across Marketing and Creative Services, managing scope, timelines, and stakeholder communication
- Redesigned event publishing workflow, eliminating duplicate data entry across 2 systems and roughly halving data entry time

Quan Co. Cards | Arlington, TX | Owner & Full-Stack Developer March 2025 - Present

- Architected and operate a secure full-stack application on AWS, managing cloud infrastructure, network configuration, and HTTPS/TLS encrypted connectivity
- Implemented application security controls including authentication and authorization, input validation, and parameterized queries to enforce data integrity and reduce attack surface
- Maintain structured records and data integrity across 300+ order lifecycles

JN Beauty College | Fort Worth, TX | IT Systems Administrator June 2019 - July 2025

- Served as sole IT point of contact for staff over 6 years, managing intake, triage, and resolution of end-user support requests across hardware, software, and access issues
- Designed and led network topology overhaul integrating NAS and cloud systems across 10+ workstations, planning deployment sequencing to avoid operational disruption
- Conducted recurring system audits to identify security gaps and implemented remediation

iPatch | Hurst, TX | Repair Technician June 2021 - September 2021

- Handled customer intake and support requests, explaining technical issues and fixes in plain language to non-technical customers
- Tracked concurrent repair orders through completion, coordinating parts, timelines, and status updates

SKILLS

- **IT Support:** Ticket intake, triage, and escalation; Tier 1 troubleshooting; hardware deployment and asset tracking; knowledge base and SOP documentation; remote support
- **Cloud & Infrastructure:** AWS, network architecture and topology design, NAS and storage systems, secure connectivity (HTTPS/TLS, VPN), system administration (Windows)
- **Security:** Secure configuration baselines, access control and least privilege, encryption, endpoint hardening, patch management, vulnerability mitigation, security auditing, phishing and social engineering awareness
- **Technical:** System administration (Windows), networking fundamentals, AWS, NAS management, backups
- **Programming & Data:** Python, SQL, HTML/CSS, JavaScript, Java, C/C++/C#, database design

PORTFOLIO
